## TeeMark Drum Packer/Crusher

**HYDRAULICS** a rugged high-speed hydraulic pump powers the heavy duty cylinder to 150,000 pounds of crushing force. The ram is automatically cycled by a unique all-hydraulic control valve. **DRUM HOLD DOWN** holds the drum in place during the return stroke. It also contains splashes and captures vapors

which can be ducted through the top of the crusher for containment.

**UNIVERSAL HEAD** the squeeze head consists of one stationary and two removable plates. The stationary head and the smaller plate are for compacting inside 55 and 85 gallon drums. The larger diameter plate is for crushing all sizes of cans and drums.

**DRUM CENTERING PALLET** The drum centering pallet is designed for removing fully packed drums with interchangeable discs which properly center each size drum. These discs also protect the bottom bead of the drum from damage during compaction. **CLEARANCE** ample loading clearance is provided

between the compaction head and the top of the drum. **SAFETY** an emergency stop button shuts off all power at a touch. A safety interlock prevents operation when the door is open. **COMPACTION FORCE CONTROL** a gauge

indicates the pressure during crushing or compaction. The operator can manually override the automatic cycle hydraulic valve at any desired pressure. Or the cycle valve can be set to automatically return the ram at any squeeze force between 8,000 and 150,000 pounds.

**PORTABILITY** the bottom has a built-in skid for easy forklift portability. A custom over-the-road trailer is also available.

MODEL	MOTOR		POWER			CYCLE TIME
	hp	type	volts	phase	amps	SEC
DPC150-E150	15	TEFC Electric	230/460	3	11/5.5	70
DPC150-X150	15	Explosion Proof	230/460	3	11/5.5	70
DPC150-G80	8	Gasoline Engine				110
DPC150-E100	10	TEFC Electric	230/460	3	22/11	110
DPC150-X100	10	Explosion Proof	230/460	3	22/11	110

**Warranty: 6 month limited on materials and workmanship**  
From 1/2-pints to 110-gallons, TeeMark Can and Drum Crushers prepare containers and their contents for recycling or disposal. Specifications subject to change without notice.

<b>Dimensions</b>	Outside 53" wide X 48" deep x 120" high Inside 32" wide X 32" deep X 48" high
<b>Cylinder</b>	8" bore, 6" rod, 44" stroke 150,000 pounds ram force
<b>Shipping Weight</b>	4000 lbs

**EXPLOSION PROOF**  
**NEMA CLASS 1, DIV. 2, GROUP D**
