TeeMark Drum Packer/Crusher

will crush drums up to 110 gallon capacity and compact material inside 85 to 55 gallon drums. Steel drums are crushed to 2-5 inch pancakes. **SAFETY** an emergency

stop button shuts off all power at a touch. A safety interlock prevents operation when the door is open. **PORTABILITY** the bottom has a built-in skid for easy for lift portability.

A custom over-the-road trailer is also available.

HYDRAULICS rugged 2 speed hydraulic pump powers the heavy duty cylinder to

85,000 pounds of crushing force. The ram is automatically cycled by a unique all-hydraulic control valve. **DRUM HOLD DOWN** the drum hold down holds the drum in place during compaction, preventing the drum from lifting during the return stroke. It also contains splashes and captures vapors which can be ducted through the top of the crusher for containment.

UNIVERSAL HEAD the squeeze head consists of one stationary and two removable plates. The stationary head and the smaller plate are for compacting inside 55 & 85 gallon drums. The larger diameter plate is for crushing all sizes of cans and drums.

DRUM CENTERING PALLET designed for removing fully packed drums with a forklift. The pallet is fitted with interchangeable discs which properly center each size drum. These discs also protect the bottom bead of the drum from damage during compaction.

CLEARANCE ample loading clearance is provided between the compaction head and the top of the drum. **COMPACTION FORCE CONTROL** a gauge indicates the pressure during crushing or compaction. The operator can manually override the automatic cycle hydraulic valve at any desired pressure. Or the cycle valve can be set to automatically return the ram at any squeeze force between 8,000 and 85,000 pounds.

MODEL	MOTOR		POWER			CYCLE TIME
	hp	type	volts	phase	amps	SEC
DPC85-E50	5	TEFC Electric	230/460	3	11/5.5	110
DPC85-X50	5	Explosions Proof	230/460	3	11/5.5	110
DPC85-G80	8	Gasoline Engine				110
DPC85-D90	9	Diesel Engine	w/ electric start			110
DPC85-E100	10	TEFC Electric	230/460	3	22/11	55
DPC85-X100	10	Explosion Proof	230/460	3	22/11	55

Dimensions	Outside 53" wide X 46" deep x 120" high Inside 32" wide X 32" deep X 48" high
Cylinder	6" bore, 4" rod, 44" stroke 85,000 pounds ram force
Shipping Weight	4000 lbs

**EXPLOSION PROOF
NEMA CLASS 1, DIV. 2, GROUP D**
